Graduate Technologist – Process Analytics – permanent role - Lonza

Join Lonza, a place to go, stay and grow, committed to high quality and operational excellence across the regions, functions and markets we serve, every day! Here at Lonza, we have an exciting opportunity for a Scientist with Process Analytics experience to join one of our fast moving, dynamic, world leading scientific teams. The successful applicants for this positions will be joining a brand new Process Analytics team within Process Development at Lonza, based in Cambridge and in Slough.

Location: Cambridge or Slough
Salary: £18,800 - £28,200, depending on experience
GRADUATES only - Preferred area of study: Biochemistry, Biomedical Sciences; this is a mid-level position where BSc, MSc or PhD in relevant scientific / technical discipline and appropriate laboratory experience is required.

Job purpose
Process Analytics provide rapid analytical support for process development for cell line selection and forward processing decisions using standard and automated assay platforms. This role is primarily a lab based position to assess, establish and/or perform a range on analytical assays including, but not limited to, HPLC, icIEF and CE-SDS techniques. This is a mid-level position where BSc, MSc or PhD in relevant scientific / technical discipline and appropriate laboratory experience is required.

The successful candidate will support Process Development by performing a range of analytical tests such as HPLC, IC-IEF, GXII, CE-SDS assays. This is a laboratory based permanent position that requires equipment maintenance, buffer preparation and data analysis. The successful candidate will be involved in team meetings and potentially attend external conferences (eg Bioprocess summit, Proteins Congress a7 and BioProcess International)

You will be joining a team of 7 (of a 40 person department of 5 teams) and will have the opportunity to help establish a new lab from scratch (equipment purchase/commission, training, processes).

Technical skills required
Essential: Technical competence in appropriate scientific discipline or technology
Desirable: Experience in HPLC, IC-IEF, GXII, CE-SDS techniques

Relevant Disciplines
GRADUATES only: Biochemistry, Biomedical Sciences; this is a mid-level position where BSc, MSc or PhD in relevant scientific / technical discipline and appropriate laboratory experience is required.
