Senior Bioscientist

Bioscientists at Sygnature Discovery play an essential role in supporting integrated client projects as well as delivering specialist biophysical and cell imaging assays. The growing department is looking for talented bioscientists to push and lead our capabilities even further.

As a Senior Bioscientist you will join a dynamic department actively discovering new drugs for a broad range of projects, molecular targets and therapeutic indications.

Key requirements;

- Ideally you will have a PhD in pharmacology, biochemistry or a related discipline
- You will apply and grow your scientific skills to develop biological assays, for example, enzyme, receptor and cell-based assays
- Experience built within a drug discovery environment is desirable
- You will be able to work independently and as part of a larger team
- You will have excellent communication skills

In return you will receive an excellent training and benefits package, such as a highly competitive salary, relocation support and pension scheme. All our benefits are tailored to enhancing your experience at Sygnature as it is important to us that you share our success. We also recognise that our environment is paramount, so we foster a collaborative and supportive culture with plenty of opportunities to grow and develop, tailored to individual and business needs. In Bioscience there are potential development opportunities for leading therapeutic area knowledge, scientific technical platforms and multi-discipline drug discovery projects.

We are an award-winning provider of fully integrated drug discovery research programmes to the global pharmaceutical industry. Our clients place great value on our highly flexible, transparent and collaborative business model. Our continuing growth has been supported by our recent move to the Discovery building in spring 2017. This is a brand-new purpose-built facility on the BioCity site in the heart of Nottingham, and as part of our success and continued expansion, we are looking for innovative and enthusiastic scientists to join the organisation.

If you are interested in joining a successful, engaged and award-winning company that places its people at the heart of its business, please send the following to careers@sygnaturediscovery.com or visit www.sygnaturediscovery.com to find out more;

- CV
- Covering letter (briefly outlining your suitability for the role)
- Confirmation of your eligibility to work in the UK (you must be eligible and able to work in the UK, independently of employer sponsorship)
- Please include reference BCS0618 in your application / cover letter
