We offer...

Funding support for conferences and lab visits

Assistance grants towards childcare, accompanying guests, or extra access requirements

Support for diversity and outreach projects in schools, groups, and charities

Grants for both members and non-members

Sponsorship towards both face-to-face and online events

Research grants to support studentships and benchwork

Support for all career stages from undergraduates to emeriti

Funding support available worldwide

Funding for both individuals and organisations

BIOCHEMICAL SOCIETY

PORTLAND PRESS

Biochemical Society

(Registered Charity No 253894)

Founded in 1911, we've been at the forefront of advancing molecular bioscience for over 100 years, promoting its importance as a discipline, facilitating the sharing of knowledge and expertise, and supporting molecular bioscientists across all career stages. We offer an extensive programme of scientific meetings and training events, grants and awards, educational resources, policy work, public engagement, and a portfolio of journals.

BIOCHEMICAL SOCIETY

Grants and bursaries

Grants and bursaries

Each year, we offer a diverse portfolio of funding schemes to support research, professional development, meeting attendance, and the organisation of events and activities.

Available to all, our wide-ranging grants programme offers valuable funding opportunities for every stage of your academic journey and career.

Conferences and travel grants

Collaborate worldwide with funding towards scientific meetings, training courses, or lab visits!

Bursaries

Stay connected with our community through support for registration, travel, or additional care costs.

Research grants

Develop and disseminate the latest scientific advances with support for studentship placements, benchwork, and outreach activities.

Sponsorship

Enhance your events and activities with funding towards keynote speakers, poster prizes, travel bursaries and more!

"Being able to attend an international meeting with the financial help of the Biochemical Society was highly valuable as it allowed me to **meet world experts**, not only to obtain vital feedback for my project but also for my thesis and upcoming publications."

Frederic Buemi

"The support of the Biochemical Society in delivering our workshop has allowed a range of early career researchers from PhD to those in early independence to **establish fundamental skills** as part of their career development."

Amy Vincent

"I would like to thank the Biochemical Society for the funding as the strong collaboration developed through this lab visit will offer the opportunity for our research to be international, **open avenues for knowledge sharing**, and give room for research capacity building, training, and mentoring."

Cynthia Amaning Danquah
