Microglia have key roles in brain development, function, pathology and neuroinflammation, while neuroinflammation protects and/or damages the brain during infection, damage, ageing and pathology. This international conference brings together the research community working on microglia and neuroinflammation to discuss the latest research, methods and ideas.

Speakers:
- Andrea Ablasser
- Suchira Bose
- David Brough
- Diego Gomez-Nicola
- Michael Heneka
- Angela Hodges
- Svetlana Khoronenkova
- Marina Lynch
- Jonas Neher
- Michael Perkinton
- Joseph Priller
- Amanda Sierra
- Sandra Siegert

Programme Coordinators:
- Guy Brown
- Jacob Dundee
- Jenny Pocock
