Grants and bursaries
Grants and bursaries

Each year, we provide over **£250,000 to support research and professional development**, attendance at scientific meetings, and the organization and hosting of events and activities through sponsorship.

Biochemical Society members can apply for a wide range of funding opportunities to support their careers.

**Conferences and travel grants** help our members cover the accommodation, travel, and registration costs of attending a scientific meeting, training course, or lab visit.

**Bursaries** support members attending Biochemical Society scientific meetings, training events, and courses, providing financial aid towards registration fees, travel, or additional care costs.

**Research grants** support summer laboratory placements, benchwork costs, research capacity building in lower-income economies, PhD scholarships, and outreach activities.

**Sponsorship** opportunities cover the hosting costs of biochemistry-focused events and activities, including independently organized meetings, lectures, seminars, and student societies.

Visit [biochemistry.org/grants](http://biochemistry.org/grants) for more information, including eligibility criteria.
£150,000 awarded in General Travel Grants since 2019

Carer grants to support childcare, accompanying guests, or extra access requirements

Support for diversity and outreach projects in schools, groups, and charities

Grants for both members and non-members

Applicable for both face-to-face and online events

£46,000 awarded to support benchwork in 2022

Support for all career stages from undergraduates to emeriti

Recipients awarded from over 30 different countries

Funding for both individuals and organizations

Biochemical Society  (Registered Charity No 253894)

Biochemistry is the exploration of life at a fundamental and molecular level, providing the basis for understanding all biological processes. Founded in 1911, the Biochemical Society has been advancing molecular bioscience for over 100 years, promoting its importance as a discipline, highlighting its role in addressing societal challenges, and facilitating the sharing of expertise. Our diverse programme of scientific meetings and training events, grants and awards, publications, educational resources, policy work and public engagement delivers opportunities to share knowledge and collaborate, providing support for a broad community of molecular bioscientists across all career stages.
